Declares Members Are Showing More Interest Than Ever Before.

Salt Lake, Oct. 7.—All marriage records in the history of the Mormon church were broken Wednesday when seventy-two couples were united. This admission came out during the conference meeting yesterday afternoon, through the address of President Anthon H. Lund, in which he declared that members of the church are showing much more interest in church work
-and evidenced the number of marriages and the attendance at other ceremonials in the temple to prove his assertion.

"We are all happy to see President

Joseph F. Smith, to have him with us, and to hear his testimony that the Redeemer liveth," said President Lund. "And it is our prayer that he is speed-No. North of Ogden. | Arrive. | Arri ferences in the future. We find in the Lucio and his two assistants were life of President Smith a pattern af-

for us. We must study our duties and then perform them. We should not shrink or neglect any of them. And there are many duties devolving upon the Latter-day Saints.

"I believe that during the last six days, months there has been much progress Ros in the church. The Saints are grow-ing nearer unto God, and perform their duties better. When I see them flock-ing to the temples, I know they feel better in spiritual matters than be-fore. The temple here during the last year has been crowded, and during the last six months there has been a great increase in the membership of the Geneaological society. I want to encourage the Saints in the good work. Yesterday there were seventytwo couples married in the temple It is a good sign."

Growth of Church President Lund then spoke of the growth of the church in the foreign field, especially in Germany, and referred to the imprisonment of twenty-one elders in Germany following an edict from the government that they want he aviled and forced out of the must be exiled and forced out of the kingdom.

"But I do not believe that has hurt the church," continued President Lund, "for within a short time after the persecution of the elders in Germany, the authorities here received many inquiries from Germany asking for particulars about the Mormon church. They called it persecution, and wanted facts regarding the church. And the reports we have received from the German mission show that the work there has not ceased. The month after this action of the police there were more baptisms than ever before in Germany.

"In a letter from Brother McKay regarding the branch at Vienna, which was established a year ago with three was established a year ago with three members, he says there are now twenty-five members in the mission. The same is true in Hungary. The church is meeting success everywhere.

"In Norway there was much excitemena a while ago among the people, because the priests and the preist were trying to pass laws prohibiting elders from preaching in Norway. But I am happy to say that the committee which was to present the bill to the congress of Norway reported that there was no need for more legislation in that regard. 'In Norway there was much excite

When we read the reports of the juvenile court we are shocked We are glad the court has been es tablished, for it is doing a great deal of good. We must take a hand with them against the evil influences which are so demoralizing to our young men and women. I do not mean that we should teach our young merely theory but practical religion. And the place for this is in the religion and other classes.

Some instances have come to my attention where there is a slacking of interest among the members of the church in some localities. And I believe in most cases that this is due to the bishop and his assistants.

They must study their congress tions, and must take up that which will interest them, and not talk to empty benches. Such is not the gen-eral rule among the Latter-day Saints, and there must be some good cause when such a condition exists. But to make the services instructive and in-teresting is the duty of those in charge and then the work of the church will continue without a check until the work knows and believes in the
